

Stay ahead of your competition. Get a firsthand look into the future of networking and security.

Why your team should come to TailscaleUp 2026

- **Be the first to go hands on with the newest Tailscale products and features**
Not only will you be first to hear the latest news on what's coming out of Tailscale's roadmap, you can also try out the latest releases yourself.
- **Talks, workshops, hands-on sessions, and more to uplevel your skills for professional development**
Sessions will cover the entire spectrum of Tailscale's use cases and platform, and feature prominent industry leaders from Tailscale's 20k+ customers.
- **Keep up with best practices by expanding and optimizing how you use Tailscale**
Whether you want to start using Tailscale for business VPN, AI governance, PAM, Edge & IoT, CI/CD pipelines, a homelab, or to solve any number of connectivity issues, don't miss your chance to uplevel your skills.
- **Bring back business benefits and cost savings from learnings on optimizing networking and security with Tailscale**
Go hands on to learn and create things you can bring back to your team. Directly translate what you learn into better efficiency, security, and more for your workplace.
- **When and where? It's happening August 26, 2026 in San Francisco**

Integrations

Engineering Leaders

Learn how Tailscale's identity-native connectivity platform boosts developer velocity across clouds, regions, networks, K8s clusters, or modern CI/CD workflows.

CISOs & Security Architects

Explore how Tailscale's Zero Trust platform can de-risk your organization, secure your AI systems, and eliminate the pain of legacy VPNs and PAM, making you the hero your engineering teams rely on.

IT & Network Managers

Discover how Tailscale's identity-based access can simplify onboarding, secure access for partners and contractors, and reduce IT tickets, while improving user experience for everyone.
